

FIT3179 Data Visualisation Test 1 Instruction - v1.1

(Aug 18)

How to do it

No items are allowed inside the room except a pen or a pencil. Bags, books (including dictionaries), electronic devices (laptops, smartphones, smartwatches, etc.), drinks and food, etc., must be deposited at the entrances of the room.

Any kind of academic misconduct (copying, collusion, use of electronic devices, etc.) will result in immediate termination of the test and will be reported to Monash University.

You must sit the test in your Allocate+ workshop; else, the mark will be 0.

If you need to make corrections, clearly erase your writing or strike it through. If multiple answers are provided, only the first one is considered.

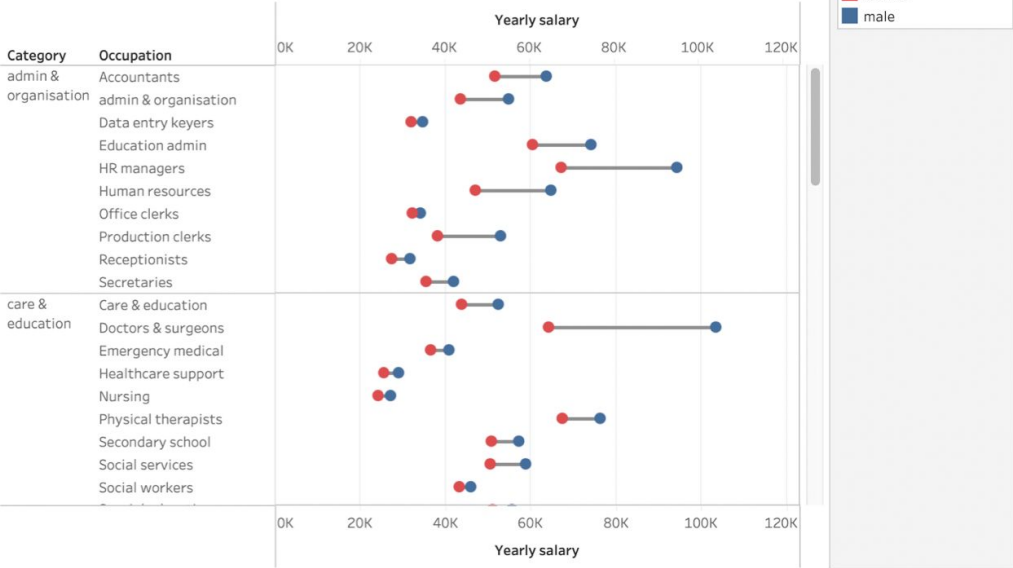

There are questions on both sides of each sheet.

Sheets are due after **20 minutes**. Late submissions are not accepted.

What to do

- Write your name, student ID and studio number at the top of the page.
- **For each visualisation, identify the name of the idiom.**
- **Identify issues resulting in misleading or difficult-to-read data visualisations in no more than 20 words.** Ignore issues related to data collection, and pixelated or blurry appearance. If the visualisation has no issues, write “none” or NA. **The listing of non-existing issues will result in mark penalties.**
- **For every issue that you identify, describe how to fix it in no more than 20 words.**
- **For each visualised attribute, identify its type, the mark, and the channel used.**
- Ignore user-interface elements, such as menus or popovers.
- If you have difficulty reading text because it is downscaled too much, ask a staff member for help.

Gender Pay Gap US

Idiom: Connected dot plot

Major issue(s) if any:

NONE

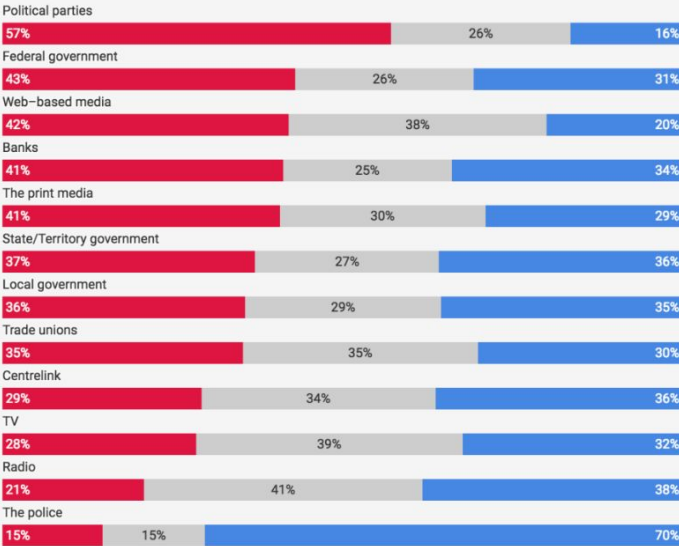

How to fix the issue(s):
